REPORT OF SUPERINTENDENT OF SCHOOLS

January, 1950

Members of The School Board and Citizens of Sullivan :

After five months as your school superintendent, it is difficult to point to any past achievements, for the time has been too short for these ; and it is not wise to promise too much for the future ; therefore I will mention mostly those things concerning school conditions at the present time.

I feel that the community is fortunate, in this time of teacher shortages, in having two capable, well-trained and dependable teachers in charge of the schools. During the past year Mrs. Montrone completed the work for her college degree and also took a valuable extension course in the evening.

We will shortly install a guidance program, modeled on that of Keene ; where each child will have a folder with his picture attached. This folder will contain information on marks, intelligence tests, aptitude tests, the health record, school activities and family data. The folder will follow the pupil from grade one through eight and then on to high school, and will service as an important device in making school more meaningful and helpful.

The school union has recently purchased an audiometer for detecting hearing difficulties and this will be available to all pupils of the community. Action has also been taken to purchase The Massachusetts Visual Testing equipment so that faulty vision of various types can be determined. Special emphasis is being placed upon visual education and the union will have at its disposal this year several film strips projectors and a complete library of film covering all subjects from grades one to eight.

Sullivan was one of the few towns in the state which received a larger share of state school aid this year than last. At

the time the present budget was voted, the sum was not known and no steps were taken to set up a program to paint and repair our schools. Both need extensive work done on them and the town will be given the opportunity to vote funds for this work this year.

STATISTICS

1. Different pupils registered in the district	42
2. Number of days schools were in session	178
3. Number of pupil days lost by absence	510
4. Percentage of absence	8.16%
5. Percentage of attendance	91.84%

These figures show that 8.16% of all school time and money was lost due to this high absence rate. Pupils lost approximately 3 years of classroom time, a serious loss indeed for their education. The town lost \$768 paid out for education but lost through pupil absence. Studies show that less than 2% of absences are for a really justifiable cause. It is important for

the welfare of the child that he be in regular attendance. We do not want sick children in school but neither do we want well children at home. Only through the realization of this loss and parental cooperation in preventing it, can we get our moneys worth from our educational budget.

CONCLUSION

I appreciate the help of the teachers, the school board, the parent-teacher association and others for their share in the effort being made to improve the schools of the community.

Sincerely,

CHARLES L. BOWLBY

REPORT OF ELEMENTARY MUSIC SUPERVISOR

Mr. Charles Bowlby,
Sup't of Schools,
Marlboro, N. H.

I herein submit my report concerning the Elementary Music in the Schools:

The ultimate aim in our Music program is to develop the kind of person who will want to carry over his musical skills and interests into his daily life, after his school experience, and, thus, contribute to the social and cultural life of his community.

Toward achieving this aim, in the Elementary grades, we are carrying on a program of singing, music reading, tonal perception, rhythmic, and listening activities.

School Music's greatest value lies in the fact that it is a cooperative enterprise, wherein all students must work well together, to get good results.

Respectfully submitted,

FREDERICK P. PERKINS,

Elementary Music Supervisor.

FOREST FIRES—OUR MOST SHAMEFUL WASTE

Everyone apparently fears fires but too many are careless with it. This is particularly true of fires in and near woodlands. Official figures show that more than 98 percent of all forest fires result from human carelessness and can be prevented. Consequently, we may say "Forest Fires are our most shameful waste".

Annual forest fire losses are tremendous and their effects far reaching. Such fires destroy the raw products of the forests, the protection forests provide for game and the supply of ground water. They upset local economies by drawing men from gainful employment and requiring the expenditure of public funds to extinguish them.

Our forest fire organization is doing a good job in keeping the size of fires small but the number of fires is increasing. In 1949 there were 100 more fires in New Hampshire than in 1948, but they burned 500 acres less. For the warden and his deputies to do the job they are capable of, they must have the cooperation of the public—YOU!

The primary objective of all fire fighters is PREVENTION—fire stoppage. This is the goal toward which your local forest fire warden and his deputies are constantly working. It can be achieved ONLY if YOU and YOU cooperate with them. It is worth YOUR effort and can be accomplished by:

- (1) Being careful with fire in or near woodland, being particularly careful with matches and cigarettes.
- (2) Securing the required written permit from the warden when the ground is not covered with snow.
- (3) Insisting that others be careful and comply with burning requirements.
- (4) Calling the warden promptly when fire is detected and aiding him to extinguish it.

Let's reduce the number of forest fires and eliminate our most shameful waste.

F. J. BAKER,
District Chief.
